Reminder: Invitation to join the Metascience Novelty Indicators Challenge

Thursday, 26 February 2026 at 21:50

To: Keisha Laraine Ingram

To Keisha LaRaine Ingram,

Thank you to those who have either completed the survey or emailed us.

If you have not yet completed the survey, the UK government's Metascience Unit and the University of Sussex are still keen to receive your expert assessments on the novelty of selected publications.

We have matched your work (Bridging Cultures: Effective Strategies for Managing International Cultural Projects in a Globalized World (DOI: 10.13165/ie-25-19-2-09)) as relevant to at least one publication in our project, which we would like you to assess. If you feel the publication(s) in focus is not actually in your area of expertise, then you can tell us this within the survey.

Sharing your expertise is quick (the median time is 6 minutes), and is crucial to our research project. Your responses will be combined with those of other experts to create a major repository of novelty evaluations at unprecedented scale. Findings will be presented only at the aggregate level and will help inform the development of policy on research evaluation. We hugely value your contributions via this personalised link.

We would greatly appreciate your expert assessments of the novelty of selected publications. Your responses will be combined with those of other experts to create a major repository of novelty evaluations at unprecedented scale. Findings will be presented only at the aggregate level and will help inform the development of policy on research evaluation. We hugely value your contributions via this personalised link.
